

The Energy Adventures of Tommy and Remi

The Mystery of the Glowing Light Grade 3 and Under

Tommy and Remi learned about many sources of energy that can be used to generate electricity. Choose a source and list one good thing and one bad thing about it.

Explore four rooms in your home and find at least three things that use electricity.

| | |
|-----------------|-----------------|
| Room: Items: | Room: Items: |
| Room: Items: | Room: Items: |

In each of those rooms, count the number of switches and wall outlets.

| | |
|-------------------------------------|-------------------------------------|
| Room: Switches: Wall outlets: | Room: Switches: Wall outlets: |
| Room: Switches: Wall outlets: | Room: Switches: Wall outlets: |

We can often waste a lot of energy by leaving the lights on or not unplugging things. List two things you can do to reduce your electricity use.

1.

2.

Try your two ways over a week. How did it go?
