

The Energy Adventures of Tommy and Remi

The Case of the Shiny Roof Grade 3 and Under

The sun is such an important part of life on Earth and we use it in so many ways. Describe three ways we use the energy from the sun:

- 1.
- 2.
- 3.

As the book explains, we can use the energy from the sun to generate electricity using solar panels, like those on Remi's roof. With an adult, go on an adventure to find solar panels in your community. Where were they?

Design your own home that uses the energy from the sun. Draw or describe it below. Consider the things from the book, but also anything else you like.
