

Place the sources of electricity generation in order for Alberta.

Do you think it is the same for Canada?

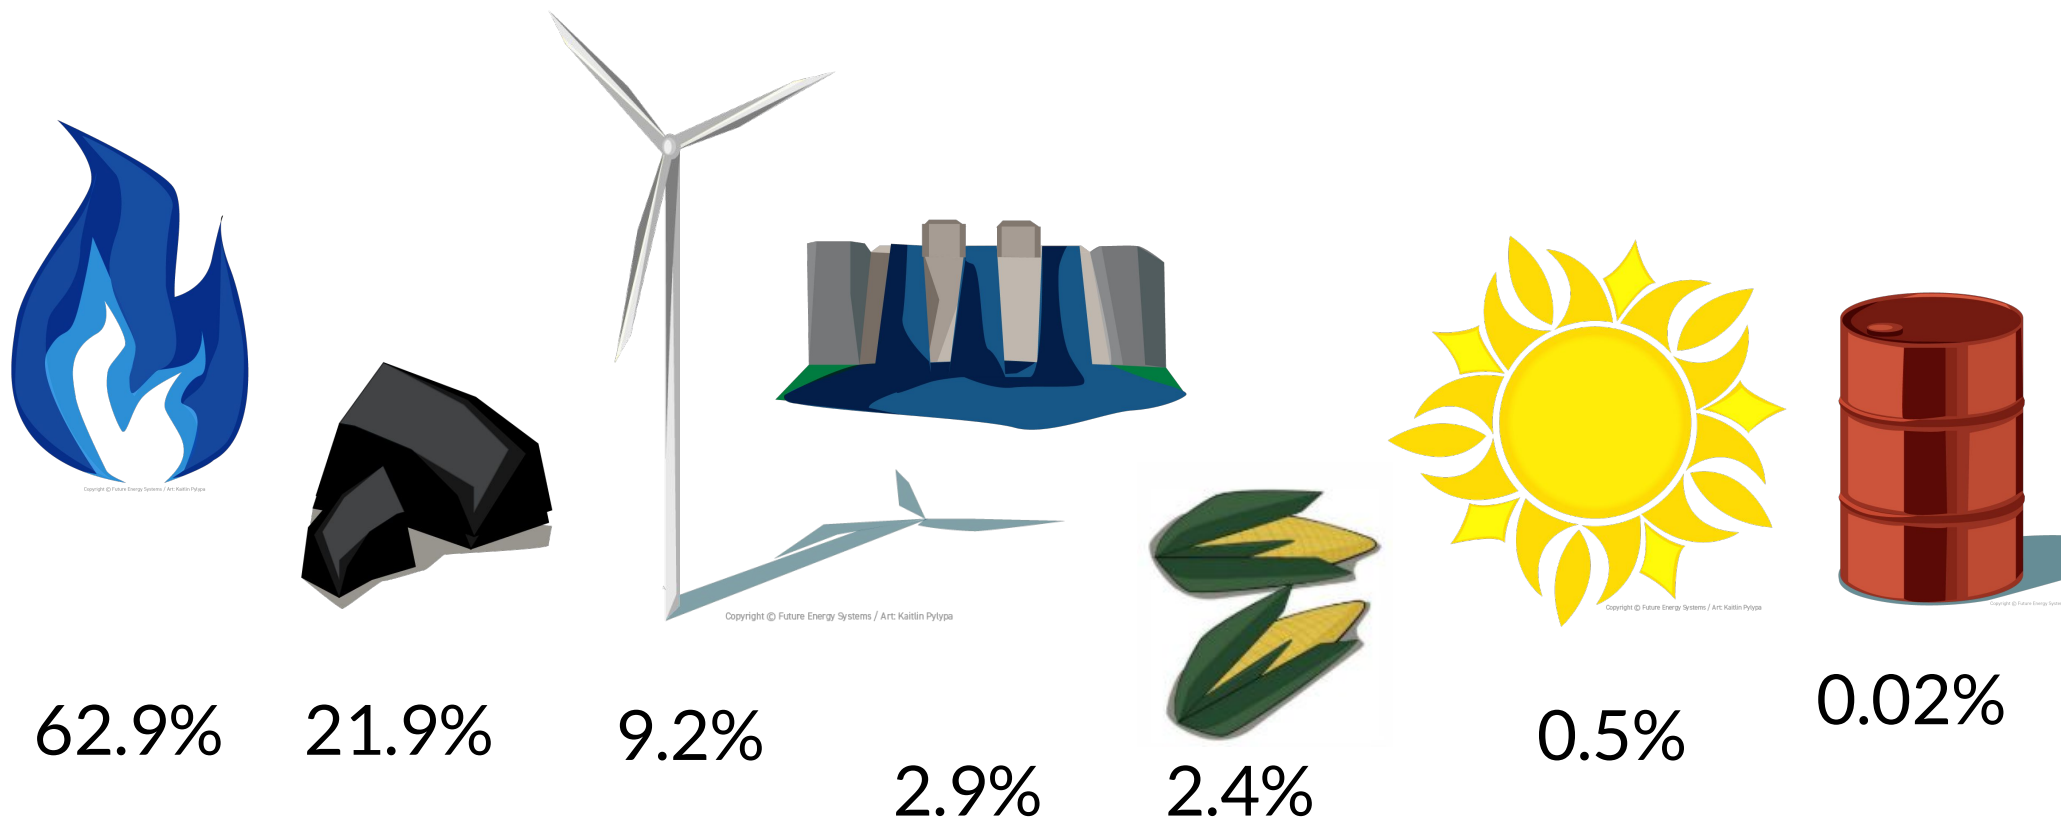

Here is a hint: there are seven sources of electricity generation in Alberta and eight in Canada.

Percentages vary depending on data source. This data is based on 2021 data according to CER Energy Future 2023.

ALBERTA

Place the sources of electricity generation in order for Alberta (in 2021 according to CER Energy Future 2023).

CANADA

Place the sources of electricity generation in order for Canada (in 2021 according to CER Energy Future 2023).
